Question 1

0.75 / 1 point

Which one(s) is(are) correct definition of a function? (select all that applies)

- ☒ makeNoise() {
 console.log("Pling!");
}
- ☐ () => {console.log("Pling!");}
- ☒ function makeNoise() {
 console.log("Pling!");
}
- ☒ const makeNoise = function () {
 console.log("Pling!");
};

Question 2

0 / 1 point

Functions execute as soon as their declarations are read by the browser.

- ☒ True
- ☐ False

Question 3

1 / 1 point

Which of the following will NOT throw an error?

- ☐ {let obj = [];}
 console.log(obj);
- ☐ { const obj = 10;}
 console.log(obj);

✓ ☒ all of the above will throw an error

Question 4**0 / 1 point**

What will the console print?

```
function checkString(str) {  
  if (str.length > 10) {  
    console.log("String is too long");  
    return false;  
  }  
  return true;  
}  
checkString("John");
```

- ☐ String is too long
- ☐ false
- ✗ ☒ true
- ➡ ☐ (The console will not print anything)

Question 5**0 / 1 point**

The style property of an element gives you a list of all styles applied to that element.

- ☐ TRUE: The style property lists both inline styles and styles from the stylesheet.
- ➡ ☐ FALSE: The style property only lists the inline styles.
- ✗ ☒ FALSE: The style property only lists the applied styles from the stylesheet.
- ☐ TRUE: The style property provides inline styles and styles from the stylesheet in two separate lists.

Question 6**1 / 1 point**

What will the console print?

```
function myFunction(a, b) {  
    a = a + b;  
    b = a - b;  
    a = a - b;  
    console.log(a);  
    console.log(b);  
}  
myFunction(5, 7);
```

- ☐ 5, 7
- ✓ ☒ 7, 5
- ☐ 57, 75
- ☐ 75, 57
- ☐ NaN, NaN

Question 7**0 / 1 point**

Where is a new element created using the createElement() method placed?

- ➔ ☐ It is not placed anywhere in the document
- ☐ at the beginning of the document
- ☐ where the last element was added
- ✗ ☒ at the end of the document

Question 8**0 / 1 point**

Using the classlist methods on an element changes the ____.

- ☐ inline classes applied to the element
- ➔ ☐ classes applied to that element in the current browser window
- ✗ ☒ CSS rule targeted by the query selector
- ☐ classes applied to that element in the HTML document

Question 9**1 / 1 point**
